To Share Google Docs

1. Go to www.google.com and sign in as your project email.
2. Go to drive, located on the top of the screen in a black bar.
3. On the left hand side, there is a red button that says create, click on it.
4. Create your doc.
5. Once you have your doc finished, click on the blue button in the upper right hand corner that is called share.
6. A screen should pop up, on the bottom there should be a text box, type in your partners names and click on the email that pops up.
7. Hit the blue button called done.
8. It has now been sent to your partners.

How to put a Decal on both sides of an object in inventor

Create an object in inventor that you want to have decaled on both sides.

Open up the origins tab on the left panel and choose a plane. Make that plane visible.

Go to the top bar where there is the plane button and drag a new plane from your first plane to create a second one above you intended decal area. Decal it like normal.

Do these same processes for the other side but before you add the image to the plane you need to Right click on that plane and click "Flip Normal." This will allow the normal view of the plan to flip and therefore the decal will be on that side now.

Tip! If you fillet the edges around your object, the decal will wrap over the side it is facing **AND** the edges if it is large enough.

Uploading IPT.

First go to Mr. Yoss's school fusion page and on the right side under "links" click Ankeny student Google which will bring you to your Google Docs.

Sign in with your ID number as your username and your mm/dd/yy + your initials at the beginning or end in all caps.

Now that you are in your Google docs account, and in the top left next the "Create" button is an upload symbol. Click it and then click upload and then you can search for your IPT. That you will be sharing.

Click Libraries -> Documents -> Inventor -> then find an IPT that you have saved. (It will have a yellow 3D square next to it.

Click on the IPT and click open. This will start and upload window in the bottom of the page.

Once it is done uploading to your Google doc, Click on it and it will open a place document.

Share it with a person.

Opening the shared IPT.

Go into your Google doc and find the Document that someone has shared with you.

Open it and you will see a blank page saying "Sorry, we were unable to generate a view of the document at this time." And this is OK.

Go to the top left where it says "file" and scroll down to where it says "Download" and click it.

This will open a small panel in the bottom of your screen and click "open"

That will automatically open your inventor with the project they sent you.

You should now be able to see the project and edit it as well.
